DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-9, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson (6,488,170). Johnson discloses, in figs. 2A and 5, a container comprising a cup 20 having a lip 15, a spill-resistant cap 30 having a C-lip engaging portion 34, a plurality of spaced apart opening 45, a plurality of baffles 40 being formed over the openings.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Berger et al. (6,640,992) or Lin (6,659,302).

Berger or Lin teaches a lip-engaging portion of a drinking cup lid being a thread portion.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the lip engaging portion being a thread portion, as

taught by Berger et al. or Lin, in order to the lid threadable engage with the container for closing the container.
